

# Specialty (HIV/STD) Clinic

---

**Specialty Clinic Update- We are only scheduling appointments on Thursdays at this time.**

## Specialty Clinic

The Specialty Clinic provides confidential testing and treatment for gonorrhea, chlamydia and syphilis. We offer on-site medication dispensing, vaccinations, STD patient education and partner notification and treatment services. Follow-up appointments may be necessary to inform clients of their test results or administer treatments. All services are performed in a respectful, professional and confidential manner.

## STD Testing & Treatment

The Marshall County Health Department tests and treats for gonorrhea, chlamydia, and syphilis. We do not perform Pap Smears, nor test or treat herpes or genital warts. **Women with abdominal and/or pelvic pain should be seen by their healthcare provider.** Click on the links below to learn more about these and other sexually transmitted infections.

### **STD Partner Notification**

Positive test results for HIV, chlamydia, gonorrhea and syphilis are reported by law to our health department by physicians, hospitals, laboratories and clinics. Our Disease Intervention Specialists follow-up on these reports with confidential partner notification services including: counseling, testing, and referral as needed to break the chain of infection.

### **Prevention of STDs and HIV**

- Abstain from sex and injecting drugs to prevent HIV and STDs.
- Always use male or female condoms with sexual activity.
- Always use a new condom for each sexual act.
- Do not use natural membrane or sheepskin condoms.
- Limit your number of partners.
- Wait 1 week after you and your partner(s) have been treated for an STD before having sex.
- Do not share needles, syringes or injection drug equipment (cotton, cookers, rinse water etc.)
